

## Infection Control - StageTag™ System

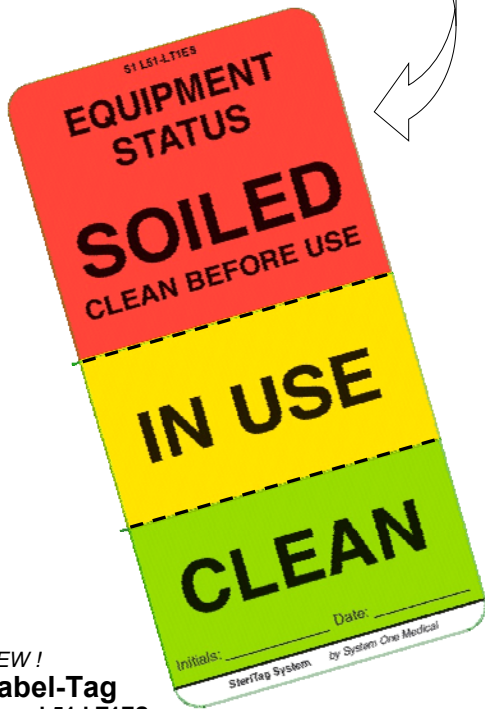

### EQUIPMENT STAGE MANAGEMENT TAG SYSTEM

#### Reduce infections and diseases by using StageTags™!

Our new Infection Control **StageTAG™** System offers a uniquely visual, cost effective and fast deployment solution to help control the spreading of infections and diseases in your healthcare facility. The Joint Commission is now more than ever looking for solutions that help to minimize infection potentials in healthcare facilities specifically with all items' usage cycle.

#### EXCLUSIVE PEEL LINER

Adhesive area allows you to paste RED portion of this tag to any tray or item. Tear off as the item is used leaving only the red portion attached to the item to be cleaned

NEW!  
**Label-Tag**  
Cat No: L51-LT1ES

Great for use on item  
with movable parts!

#### StageTAG™ System benefits:

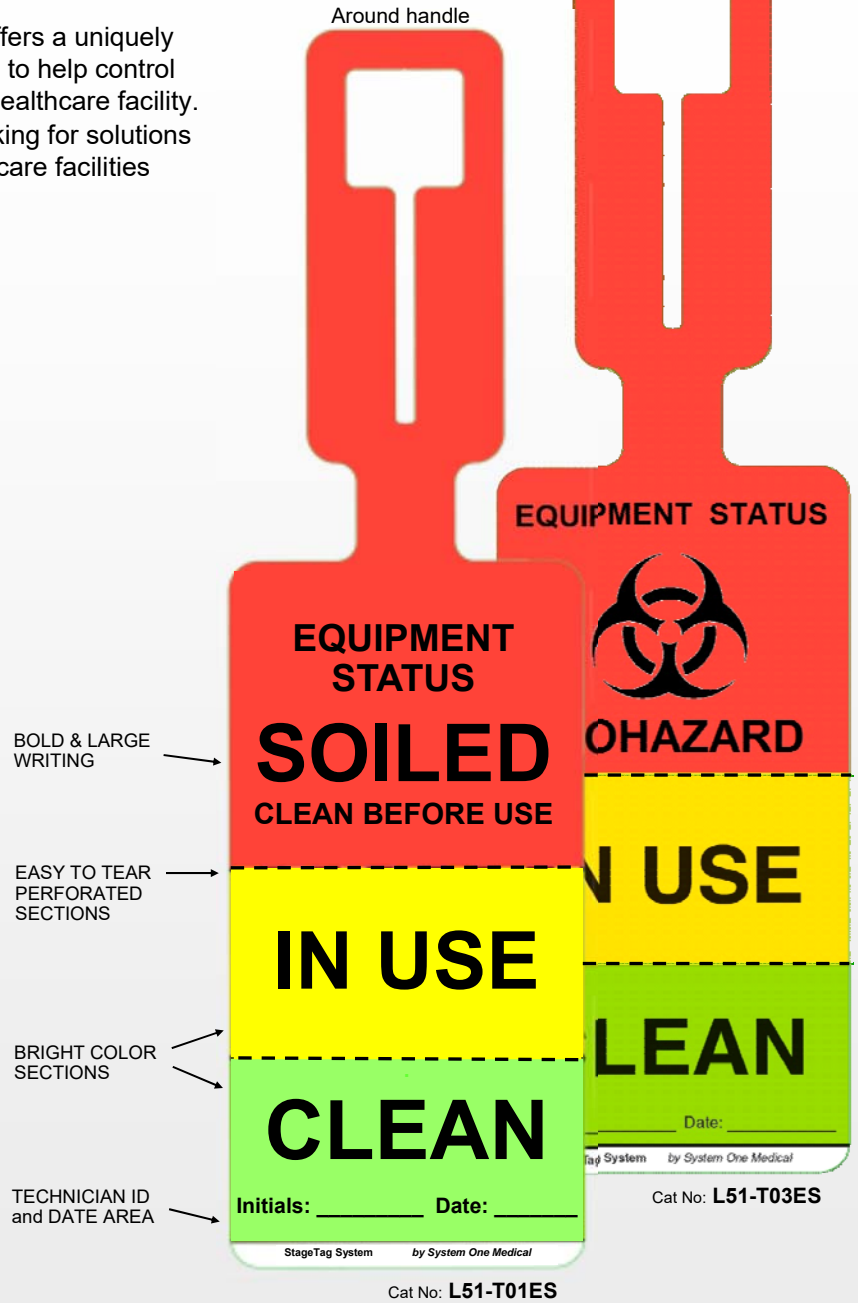

- Made of Durable Synthetic Material
- Tagging System with Micro Perforations for Easy Tear Off
- Friendly Color Coded System Provides Visual Enhancement for Each Stage
- Initials and Date spaces help traceability
- Validated for all Sterilization processes including V-PRO® & STERRAD®
- Custom Prints and Colors also Available

V-PRO® VP4®

VALIDATED for ALL SYSTEMS

and DATE AREA

From "CLEAN" to "IN USE" to "SOILED", our equipment **StageTAG™** Management System offers a unique visual color coding combination to help identify each item usage stage fast and safely. Now you can easily tag items such as walkers, IV pumps, PCA pumps, SCD machines, commodes, crutches, blood pressure monitors and anything that comes in contact with a patient's skin surface to reflect their status at all times clearly and confidently.

## Sterilization Color Tags - *SteriTags*™

Color *SteriTags*™ have been specifically designed to improve item management, tray identification and reduce costly mistakes. This new system dramatically enhances your tray identification and tray maintenance schedule proceedings.

Our *SteriTag*™ System solution can be customized to meet all of your particular coding demands. Two formats are available to begin your new custom tag system:

**SteriTags** (flat surface color tags)  
**SteriPockets** (pocket cuts color tags)

These sterilization tags allow you to handwrite directly on to the tag or you can apply your information label to further enhance your current system with colors and vital information

***SteriPocket*™ System**  
(pocket color tags)
